REASONS FOR ALLOWANCE

The instant invention is deemed to be directed to an unobvious improvement over the invention patented in Patent No. DE 3032277 A1 to Granderath and US Patent No. 5,913,613 to Ragsdale et al. The improvement comprises an actuation system and method for actuating a system of a pool cover with a first vent sequence valve in the second hydraulic power supply/return line connected between the source of hydraulic power and the second hydraulic driven component for the purposes of ensuring the lid member is fully open before unwinding or winding of the pool cover.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

PRIOR ART

The patents to Granderath and Ragsdale et al. are cited for the showing of pool cover systems similar to applicant's but lacking a first vent sequence valve.

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consists of four patents.

Epple (6,324,706), Mimeur (3,718,215), Granderath (3,613,126), and Goff (1,551,512) are cited to show pool cover systems.
